

he UAE has visions of becoming a world leader in entrepreneurship and technology. These personal rapid transit pods have allowed mobility within Masdar city allowing it to remain a carbon-neutral and car-free city. According to KPMG's 2019 Autonomous Vehicles Readiness Index, the UAE is in the top 10 countries in the world. In January 2019, the UAE tested autonomous taxis in the Dubai Silicon Oasis area. It will offer a tech-driven way of community living by featuring residential areas, co-working spots, and green spaces while remaining a sustainable city.
