

Section 3: Design Your Preferable Work Future Design Thinking Approach to Strategy: Empathise: To prepare for the future, I would first seek feedback from my colleagues, leadership, and other stakeholders about how they perceive automation and AI affecting our work. Test: Implementing these strategies in my day-to-day tasks and gathering feedback from colleagues will help refine the approach. Additionally, incorporating AI tools into our workflows to streamline repetitive tasks, freeing up time for more strategic work, could be a valuable strategy. Outcome: The goal is to empower myself to stay relevant in the workplace by integrating automation into my workflows while leveraging human strengths. I would conduct surveys or informal interviews to understand the challenges and opportunities they see in adopting new technologies. The challenge is balancing the technological evolution with maintaining and enhancing human-centric skills in a rapidly changing landscape.
