It's just amazing.We're seeing the colonial white supremacist mentality take over the dehumanization and demonization of the Palestinians and giving Israel free reign to wreak so much havoc and destruction.There are not just war crimes and crimes against humanity, and these are deliberate massacres.And I think that they have violated the most basic norms of morality and human behavior.And they are inflicting so much pain, death and destruction on a captive, helpless population.So clearly now we are seeing the fault lines of north, south, the global south versus the northeast and west.
