

My name is hayam and I am 16 years old. I also love watching movies with them, especially animated films and comedies. My parents always encourage me to try new things, so I've recently started learning how to cook simple meals. In my free time, I have a few hobbies. I also like to play soccer with my friends. It helps me stay active and have fun. On weekends, I enjoy spending time with my family. Sometimes we go on trips to the park or visit new places. Weekends are a great time to relax and enjoy time with my loved ones. I live with my family in a nice neighborhood. I go to school every day, where I enjoy learning new things, especially science and math. After school, I like to spend time with my friends. We often play games or talk about our favorite shows. I enjoy reading books, especially mystery and adventure stories. I always try to be kind and help others when I can. It's fun, and I like helping out in the kitchen. I also take some time to do my homework and prepare for the next week.
