

Al Qurum beach is a long public beach for every body and is characterized with the useful resource of the use of the presence of many famous consuming locations and cafes similarly to most of the remarkable high-stop inns frequented with the useful resource of the use of tourists. To facilitate webweb page traffic from the bus station to the beach promenade, webweb page traffic lights for pedestrians may be brought on the street to make sure the safety. We were inspired with the useful resource of the use of the idea of our undertaking from severa things, which incorporates the Great Wall of China, the Qurum Beach Corniche itself to format our undertaking is to assemble a walkway over the mangrove nature reserve simply so people can enjoy the view of the mangrove forest and the creatures spherical it. The intention of building the walkway is to encourage people to use their toes more, in place of passing on the beach with cars high-quality moreover to fulfill the desires of visitors to the vicinity and facilitate it without any harm to the environment. By along with bus stations to reduce the need for private use of cars to get there, similarly to developing the earnings with the useful resource of the use of placing huts on the walkway and corniche and renting some of them and others as public toilets, a place for selling snacks and beverages on the begin and stop of the walkway. Its ground is fabricated from cement clay simply so the bikes can byskip smoothly, and cement clay is the remarkable possibility withinside the environmental element compared to the same old cement because it maintains the temperature of the vicinity and absorbs moisture. The mangrove nature reserve moreover makes the beach more interesting.
