

My childhood was full of happy memories with my lovely family, I had three siblings that I loved playing with them very much, I remember all the toys we used to play with, and we used to go out of the house to play in the park with sports equipment, like soccer equipment. I remember the smell of my grandmother's food and remember it's delicious taste, as I used to eat food made by her, as she used to mix spices and oils, so the smell seemed very delicious, and I also remember when I went out with my family and my siblings on a walk to visit the zoo and spend a wonderful day, where my mother prepared a perfect lunch to have it in the garden. really, it's great memories.
